

NF2 multidisciplinary meeting

LEIDEN UNIVERSITY MEDICAL CENTER

Friday 2 June 2017

12:00–17:00 pm

Lecture room ORL
(Route 506, 5th floor)

This mini-symposium was designed to gather together the various professionals involved in diagnosis, treatment and rehabilitation of patients with NF2. The exchange of scientific information is of great benefit to these patients. The field of expertise is rapidly growing mainly due to the spirit of interdisciplinary cooperation among professionals involved in the care of NF2 patients.

The newly founded NF2 outpatient clinic is as multidisciplinary as the disease itself.

We are honoured by your participation.

Programme
